## TEKsystems launches its Adobe Flex® Training Programme for Web Developers

**LONDON, UK >16<sup>TH</sup> APRIL 2009.** TEKsystems®, a division of Allegis Group Ltd, has announced the launch of its Adobe Flex® Training Programme. Through this programme, TEKsystems is focusing on training web developers on Adobe Flex® and Adobe® AIR™, a free, open source framework for building rich internet applications. This programme will allow developers to build upon their existing Adobe® Flash® and ActionScript™ 3 skills and expertise enabling them to deliver enhanced the web experiences.

Current economic conditions have had a real impact on web developers in the UK. Many developers are increasingly looking at how they are going to develop their skills in order to secure their next assignment; looking in particular at what is currently in demand and what will set them apart from other developers. It is demand however, for developers with expertise in Rich Internet Applications (RIAs) that is still growing particularly those with knowledge of Flex development.

TEKsystems' training programme provides a combination of classroom work and exercises as well as projects that leverage Adobe's Flash Builder 3 Professional software and methodologies with developers being able to apply what they have learnt in the market place. "We have partnered with Mike Jones of FlashGen.com, an industry leading developer and international speaker on RIA development as well as author, contributor and technical reviewer of various books on Flex, Flash and ActionScript, to help us develop the training programme to meet up with the increasing demand for Flex developers. With this programme, web developers will be equipped with the right skills that will keep them on the forefront of web development and make them more able to deliver a superior solution to our customers," said Ross Fleming, Business Development Manager at TEKsystems.

The three day training programme covers Developing Applications in Flex, Extending the Flex Framework, ActionScript 3 and Flex and From Flex to AIR. The programme will offer developers the opportunity to sit the Adobe Flex 3 with AIR ACE exam at the end of the training to become an Adobe Flex® Certified Expert (ACE).

For further information on TEKsystems' Adobe Flex® Training Programme please email [flex@teksystems.co.uk](mailto:flex@teksystems.co.uk).

### About TEKsystems

TEKsystems®, a division of Allegis Group Ltd provides technology staffing and services, helping businesses deploy high-calibre IT and communications expertise under a range of delivery options including Staffing Services, Team Services, Global Services, and Workforce Management Services. We've become a billion-dollar services company by continually building on what we do best – blending superior client service with an unrivalled

ability to source and manage talent to precise specifications, resulting in successful technology executions.

Our offerings address various applications, infrastructure, and communications needs including technology deployment services, enterprise software support services, and asset management services.
